A UI/UX developer adept in creating aesthetically pleasing and approachable interfaces while keeping the user experience in mind. I possess proficiency in HTML, CSS, jQuery, and JavaScript, which allows me to create responsive and interactive designs. I am familiar with React JS at a basic level. To ensure my designs are innovative and efficient, I continuously improve my knowledge of current UI/UX developments.

EXPERIENCE

Senior Associate - Experience Design   Jan 2024 - Present
Associate - Experience Design   Nov 2021 – Dec 2023
WongDoody + Infosys, Pune
Design System -
- Using HTML, CSS, jQuery, and JavaScript to create components and patterns based on the designs received.
- Ensure that the developed component and pattern are tested for their usage functionality and accessibility (WCAG 2.1) to ensure seamless delivery.
- Managing and updating the project portal that was created using React.
- Handling server drops for the portal (if any) to ensure that the portal is accessible all the time.

Accessibility -
- Did Automated and Manual testing of websites to check its accessibility with the guidelines set in WCAG 2.1.
- Performed automated testing using HTML validator and WAVE tool plugin, and manual testing using NVDA screen reader.
- Provided remediations for the accessibility issues from development perspective

Mircosite -
- Internal website used to showcase all the case studies in detail.
- Initially the website was created using Angular JS, recreated the website using HTML, CSS and JavaScript for easy maintenance and updates.

EDUCATION

Bachelor of Technology (B.Tech.) - Mechanical Engineering   Aug 2017 - Jun 2021
University of Mumbai, Mumbai

SKILLS

Intermediate in: HTML, CSS, jQuery, JavaScript
Basic in: React JS

HONORS & AWARDS
